

HikCentral Professional License

Thank you for choosing HikCentral Professional.

License Performance

Activation Code	8056-5c8c-10a5-4727-8f42-7fd9-f717-a291	
Purchase Order	TPJL2511085902	
Expiry Date	2099-12-31	
License Basis	Package Type	Basal
Maintenance Service	Primary Service(SUP)	36 Months
	SUP Channel	0 Channels
VSS	Video Management Module	Yes
	Video Management	20 Channels
	AcuSeek Camera	16 Channels
BI	People Density Analysis	Yes
Third-Party Integration	OpenAPI	Yes
Education	Class Attendance	Yes
	Course Inspection	Yes
	Course Record Module	Yes
	Course Record	200 Unit
AI	AcuSeek Module	Yes

* The Software Upgrade Period and Software Service Period starts from the day when License is activated

Software Requirements and Hardware performance

- For recommended Server and Client configuration and expected performance please refer to following document: [LINK](#)

License Activation

- Activating/Deactivating Hikvision software license by offline mode [LINK](#)

Recommendations for cybersecurity:

- Block unauthorized computers or devices to access the local network, and forbid unauthorized connection to untrusted network on rightful computers.
- In case some services must be exposed to an untrusted network, build a Demilitarized Zone (DMZ) to add an additional layer of security to the Local Area Network (LAN), so that an external attacker only has access to the services in the DMZ, rather than any device of the LAN.
- Create VLANs to divide the network into different broadcast domains, and apply strict security strategies for important VLANs.
- Use VPN for remote access, which interconnects remote, and mostly geographically separate, networks through public communication infrastructures, such as the Internet.
- Choose proper security technologies to enhance the network safety, such as intrusion detection system (IDS), ACL (Access Control List), 802.1x, RADIUS authentication and Security Auditing.
- Adopt Domain Control on Windows Server Systems, whereby computer users are granted to have a number of necessary permissions.

Attention

To ensure the proper use of your license, please subject to the following items:

- The license can be applied to activate only one Hikvision SYS platform at a time.
- The license should be kept in a safe place. Hikvision shall not provide replacement for any loss of the license.
- The Upgrade license can only be applied on platform of standard versions (customized versions excluded)
- **NEW: Due to the upgrade of License system, if the version of your HikCentral Professional is V1.5.0 or earlier, you need to upgrade your software or install a patch following professional instructions. Instruction(*User Manual*) and patch installation package(*License Patch V1.1.0-V1.5.0*) download [LINK](#)**
